NATURAL BURN CARE CREAM
100% All Natural Formulation

NATURAL BURN CARE CREAM WILL
SIGNIFICANTLY HASTEN THE BURN HEALING
PROCESS AND REDUCES SCARRING

Natural Burn Cream is great as a preventive against infections on open burns and is useful for treatments of: •Deep Non-Healing Burns (in particular for Diabetic Burns) • Chronic Inflammation • Wounds • Radiation Burns • Insect Bites.

The important goal in the burn treatment is to achieve burn closure. Healing process of open cutaneous burns includes the following stages: (i) inflammation, (ii) fibroblast and blood vessel proliferation, (iii) open connective tissue synthesis, (iv) epithelialization, and (v) burn contraction. Healing burn can occur more quickly in a moist environment than in burn left exposed to air. Burn injury decreases the protective barrier and contaminants from different sources enter the body and causes infection. The burn treatment is complicated due to infection; therefore, the important goal of burn treatment should be to prevent or reduce infection. Emergency treatment of burns can help alleviate pain and reduce burn damage.

- Treatment of burns topically is directed to keeping the burn as clean as possible and making the burn most is advantageous to patient comfort.

- The composition of Natural Burn Care Cream containing the natural biological active ingredients dissolves pus in the debridement process (i.e. burns cleaning process) • prevent healthy tissue from the being compromised or destroyed by infection • keep the burn free infection and help to maintain a bacteria-free environment • reduce irritation, itching, and discomfort of the skin • stimulate antiviral, antibacterial, and anti-microbial activities, and epidermal proliferate activity of the skin.

- Natural Burn Care Cream contains 100% natural ingredients such as surfactants, thickeners, preservations, antioxidants, natural oils, and biological active ingredients, which provide efficient transports biological active ingredients through the skin. Most topical treatment used today are **not** effective, or in many cases, can cause further skin irritation instead of healing the problem, since the most from topical treatment creams contain chemical ionic surfactants, thickener, gel-(emulsion) formation polymeric agents, and etc., which block pores and block active center of biological active ingredients significantly decreasing the healing activity. Natural BURN CARE CREAM contains 100% all natural ingredients has high healing efficiency without adverse side effects and may use for dry and sensitive skin.

- In many cases, antibiotics and hormone therapy are the only recourse, but with the use of Natural Burn Care Cream positive effects are apparent usually within one week of the start treatment.

- Natural Burn Care Cream is a sterile product that is

safe for use on open wounds and burns. It dissolves pus in the debridement process, i.e. burn cleaning process.

- Introducing a new topical formulation created just for burn care with any kind of the skin including dry and sensitive skin.

- Burn control is most effective when only a very small amount is applied.

- For the First 1 to 2 days of using of Natural Burn Cream may increase inflammation and/or redness since the infection coming out of your pores, and should not alarm you. After one week, you will see significant clearing of the skin.

Purpose: For the treatment of burns. Penetrates in pores to control burns and helps keep skin clear of new inflammation. Helps prevent the development of new infections. Natural burn care cream is water-soluble product which easily removes with water so that removal does not cause the patient additional pain or tissue damage.

Directions: Small amount of the cream cover the entire affected area with thin layer three to four (as needed) times daily.

Biological active ingredients

- decrease transdermal water loss
- prevent healthy tissue from the being compromised or destroyed by infection
- encourages new skin growth
- keep the burn free infection
- help leave the surface of burns clean and odor free
- help to maintain a bacteria-free environment
- reduce irritation, itching, and discomfort of the skin
- stimulate antiviral, antibacterial, and anti-microbial activities, and epidermal proliferate activity of the skin
- promote faster healing due to quicker absorption and prolonged duration
- stimulate of blood circulation.

100% ALL NATURAL INGREDIENTS
