

ECZEMA CREAM

YOU ARE FOUR WEEKS AWAY FROM CLEAR AND HEALTHY SKIN USING NATURAL ECZEMA CREAM

- Nature's Pharma offers unique 100% natural/organic Eczema Cream in the form of water-soluble triple emulsion/suspension providing transdermal delivery of microencapsulated biological active ingredients through the skin. Eczema Cream is produced by a revolutionary US-patented technology and do not cause side effects on normal, sensitive, and hypersensitive skin.
- Natural Eczema Cream is great as a **preventive against eczema**. One light application at bedtime will help eliminate bacteria from forming redness and may eliminate future skin problems.
- Dermatitis (include atopic dermatitis, nummular dermatitis, seborrhea dermatitis, irritant contact dermatitis, and allergic contact dermatitis) or eczema is inflammation of the skin associated with abnormal amounts of excessive fluid (commonly water and sodium) usually in subcutaneous spaces (intercellular spaces, between the cells) in the body. Inflammation of the skin that accompanies dermatitis or eczema, produces scaling, flaking, thickening, weeping, crusting, color changes, and itching.
- In many cases, antibiotics, chemicals, and hormone therapy are the only recourse, but with the use of Natural Eczema Cream positive effects are apparent usually within one week of the start treatment.
- Natural ECZEMA CREAM contains 100% all natural ingredients has high healing efficiency without adverse side effects and may use for dry and sensitive skin. Most topical treatment used today are **not** effective, or in many cases, can cause further skin irritation instead of healing the problem, since the most from topical treatment creams contain chemical ionic surfactants, thickener, gel-(emulsion) formation polymeric agents, and etc., which block pores and block active center of biological active ingredients significantly decreasing the healing activity.
- Introducing a new topical formulation created just for any kind of the skin including dry and sensitive skin.
- Eczema control is most effective when only a very small amount is applied.
- After your skin has been cleaned, use a very small amount at bedtime as a preventative, to prevent recurrence on the area where you normally would have a flare up.
- For the First 2 to 5 days of using of Natural Eczema Cream may increase inflammation and/or redness since the infection coming out, and should not alarm you.
- After two weeks, you will see significant clearing of the skin.

Purpose

It is useful for the treatment of eczema, clears up redness and allows skin to heal. Penetrates in pores to control eczema and helps keep skin clear of new redness. Helps prevent the development of new

Eczema symptoms. Natural eczema cream is water-soluble product, which easily removes with water.

Biological active ingredients of natural eczema cream:

- decrease transdermal water loss
- reduce irritation, itching, and discomfort of the skin
- stimulate antiviral, antibacterial, and anti-microbial activities, and epidermal proliferate activity of the skin
- increase cellular turnover, strengthens skin
- stimulate anti-aging and anti-oxidant properties
- diminish appearance of broken capillaries
- stimulate as co-factor the production of collagen
- improve tone and texture
- promote faster healing due to quicker absorption and prolonged duration
- stimulate of blood circulation.

Directions:

Cleanse the skin thoroughly before applying cream. Small amount of the cream cover the entire affected area with thin layer three times daily. Because excessive drying of the skin may occur, start with one application, and then gradually increase to two or three times daily if needed or as directed by a doctor. If excessive skin irritation develops or increases, discontinue use and consult your physician.

100% ALL NATURAL INGREDIENTS

Active Ingredients

Salicylic Acid (2%)
