Healing Skincare

REcapture I **with DHEA & Vitamins**

Natural Anti-Aging Cream with DHEA will help to fade and remove the blemishes and spots associated with aging or sun damaged skin.

- Using our unique US patented technology we developed a stable aqueous formulation of Natural Anti-Aging Cream with DHEA & Vitamins (DHEA CREAM) in the form of the water-soluble triple emulsion with high transdermal penetration active ingredients through the skin. This formulation delivers more than 5 times the amount of DHEA & Vitamins in normal, dry, and sensitive skin compare with oral administration. These levels cannot be achieved by oral administration without severe side effects.
- DHEA (DeHydroEpiAndrosterone) is a natural steroid hormone produced from cholesterol by the adrenal glands. DHEA is chemically similar to testosterone and estrogen and is easily converted into those hormones. DHEA production peaks in early adulthood and declines in production with age in both men and women. It is the most abundantly produced adrenal hormone in the body, although with age, stress or certain disease conditions, the levels drop dramatically. It is now known that DHEA is the substance from which other important hormones such as estrogen, progesterone, testosterone, and cortisone are made. For this reason, it is often called the mother of all hormones. DHEA is natural hormone extracted from *Dioscorea Barbascos* root.
- DHEA is the magical fountain of youth often trusted by people for healthier aging process and increased longevity. Levels of DHEA in the body do change throughout life. DHEA levels are lower in unhealthy aging individuals, compared to their more healthy counterparts.
- DHEA is useful for treatment of arthritis, lupus, Parkinson's, multiple sclerosis, inflammatory bowel disease, thyroid problems, herpes infections, stress, depression, allergies, and hormone imbalances. It has been used successfully for building lean muscle mass and has positive effects on collagen and skin integrity.
- Issued of pharmaceutical research, DHEA as a natural steroid hormone:
 - Increases longevity up to 50%
 - Protects against free radical damage and strengthen tissues
 - Diminishes brown age spots
 - Diminishes wrinkles
 - Regenerates the cells of the epidermis
 - Ameliorates the firmness, tonicity, and elasticity of your skin.
 - Improves immune function
 - Decrease in cardiovascular problems
 - Reduced risks of cancer
 - Very marked and substantial decrease in bone demineralization
 - Improved fat loss
 - More muscle mass
 - Reduced autoimmune disorders
 - Reduce risk of heart disease.
- Studies show that DHEA is absorbed by skin when applied topically. A study from CHUL Research Center (in Canada) shows that the skin activity of DHEA applied **topically is 85-90%** greater than when taken **orally** (at least in rodents) (Labrie et al. 1996) [see "*DHEA-Replacement Therapy*", www.LifeExtensionVitamins.com].
- DHEA Cream containing DHEA, Vitamins, and natural biological active ingredients has high healing efficiency without adverse side effects and may use for dry and sensitive skin.

- Unique properties of DHEA Cream is due to using microencapsulated active ingredients in such as DHEA, Vitamins, herbal extracts, and essential oils which allow:
- provide very effective transdermal delivery of active ingredients through the skin barriers
- control release of active ingredients and, as a result, provide high efficiency of their penetration into the blood
- significantly decrease concentration of active ingredients (more than three times) in tablets due to effective penetration of active ingredients through the skin in order to achieve the same level their concentration into the blood.

COMPOSITION OF DHEA Cream

Active Ingredient: **DHEA (DeHydroEpiAndrosterone) (*Dioscorea Barbascio*) 2.5%.**

Other Natural Ingredients: Blackcurrant (*Ribes Nigrum*) Seed Oil, Black Cohosh (*Cimicifuga Racemosa*), Borage (*Borago officinalis*) Seed Oil, Burdock (*Arctium Lappa*), Chamomile (*Chamaemelum Nobile*), Cystine, Glutathione, **Safflower Oil**, Primrose Oil, Safflower Oil, Siberian Ginseng (*Eleutherococcus Senticosus*), Vitamin B5 (*Pantothenic Acid*), Vitamin B6 (*Pyridoxine*), Vitamin C (*Ascorbic Acid in microencapsulated form*), Vitamin A, Vitamin E (*daTocopherol*).

Direction: Apply to a clean face and neck the value of a 1/4-teaspoon (or 1.05 g) once a day in the morning, corresponding to 25mg of DHEA for the best results.

Precautions: To be used only by adults. Do not use in case of pregnancy, breast-feeding, breast cancer, cancer of the ovaries, or prostate cancer.

Recommendation: Use **RECapture I** in the morning, combined with the use of **RECapture II** cream at bedtime. These two creams complement each other to give your skin a younger, softer look.
